H

Health and Nutrition Services

Head Start is committed to serving the “whole” child, and doing so begins with providing for the child’s health and well being. Head Start assists parents with finding permanent medical homes, conducts health screenings at centers, and ensures that nutritionally balanced and quality food is served to the children at all our centers. Head Start also provides mental health and nutrition consultations.

F

Family Involvement

Head Start offers a variety of adult education services to support Head Start parents in their role as the child’s first and most important teacher. Many Head Start parents take advantage of English, GED, and job skills training, empowering themselves to succeed, while simultaneously providing their children with a positive role model of the benefits of lifelong learning

P

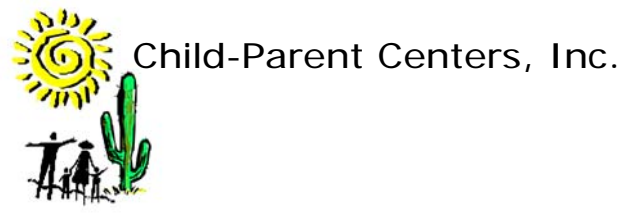

Program Options

Part-Day Classroom
The traditional model for Head Start is the part-day classroom. In this model, between seventeen and twenty children share a classroom at the center four days per week, four hours per day. At a limited number of sites, transportation is available to get children to the center.

Full-Day / Full Year
The full day program is available to children in both the Head Start and Early Head Start age groups. The program is designed to meet the needs of working families by providing Head Start services as well as quality child-care. To be considered for this program, the parent / primary caregiver must qualify for DES Childcare Subsidy. The program operates Monday through Friday, year-round.

Family Literacy
The family literacy model is available in both the Head Start and Early Head Start programs. In this model, parents attend the center along with their child and participate in their child’s education. In addition, parents have the opportunity to participate in Adult Education opportunities such as English as a Second Language, GED courses, vocational training and parent discussion time. Family Literacy meets 5 days per week, five hours per day and encompasses all of the comprehensive approaches of the traditional Part-Day model in addition to the Family Literacy activities.

Early Head Start Home Based
In this program model, families are visited in their home weekly by a Head Start Family Educator. Bi-weekly group experiences provide socialization time as well as preparation for children to move into a classroom environment. Early Head Start Home Based program serves children birth through age three and pregnant women. Head Start Home Based program serves children age three to five.

C

Child-Parent Centers, Inc.

Child-Parent Centers, Inc, was founded in 1967 as a not-for-profit organization serving a small number of children and families in the Tucson area.

Today, we have Head Start centers located in Pima, Cochise, Santa Cruz, Graham and Greenlee counties. These centers employ more than 500 employees who serve over 2700 children and families. We have partnered with Easter Seals Blake Foundation Children and Family Services to further expand our services

E

Early Childhood Education

Head Start was created to help children from low-income families prepare to enter kindergarten. For over 40 years Head Start grantees like Child-Parent Centers, Inc. have delivered quality education services that teach preschoolers and preschool age children with disabilities the literacy, math, science, art, and social skills necessary to succeed.
